

K-Love is one of two of the only radio stations that I listen to. It is also the only one I let my eleven year old son listen to. If this station were to be displaced by an LPFM broadcaster providing other programming, my world, my sons world and the rest of the community that relies on this station would be greatly affected. There are no other stations worth listening to. K-Love provides the best music out there, great parenting advice and to me, they are part of my family. I count on them to be there for me every day. K-Love is in the very best interest of the public. There is nothing provided in their program that does not serve us. Everything in it is positive. Everything you hear is uplifting and encourages you to be a better person and treat others with compassion and love. I could never fully explain how greatly it would affect me if this station were taken off the air. My mom died of breast cancer 5 years ago when I discovered this station. K-Love helped bring me thru the worst time of my life and they continue to be there with me thru other hard or sad times. Please do not do anything that would make it so that I could not continue to listen to this station. Thank You. God Bless, Lisa Rosenau
